de Schauen Sie nicht lange auf die Lichtquelle. Vorsicht! Das Kühlelement auf der Rückseite heizt sich auf, wenn die Scheinwerferlampe in Betrieb ist. Achten Sie bitte darauf, dass alle Teile ordnungsgemäß befestigt sind, damit bewegliche Teile oder Funktionen des Fahrzeugs nicht beeinträchtigt werden. Nicht im öffentlichen Straßenverkehr zugelassen.

en Do not stare at the operating light source. Caution! The cooling element on the back will heat up when the headlamp is in operation. Please make sure that all parts are fixed properly to avoid interference with any moving part or function of the car. Off road – not approved for use on public roads.

fr Ne pas regarder la source lumineuse allumée. Attention ! L'élément de refroidissement à l'arrière se réchauffe lorsque la lampe de phare est en marche. Veuillez vérifier que tous les éléments sont correctement fixés, afin d'éviter toute interférence vis-à-vis d'éléments ou équipements mobiles de la voiture. Hors route – non approuvé pour une utilisation sur les routes publiques.

it Non fissare la fonte luminosa in funzione. Attenzione! L'elemento di raffreddamento sul retro si riscalda quando la lampada del faro è in funzione. Assicurarsi che tutte le parti siano fissate in modo corretto per evitare interferenze con eventuali parti in movimento o in funzione della macchina. Non omologato per l'utilizzo su strade pubbliche.

es No mire hacia la fuente de luz en funcionamiento. ¡Precaución! El elemento de refrigeración situado en la parte posterior se calienta cuando la lámpara del faro está en funcionamiento. Asegúrese de que todas las piezas están ajustadas correctamente para no interferir con ninguna pieza móvil o función del automóvil. Para uso fuera de la carretera – no está homologada para uso en la vía pública.

ru Не смотрите на источник света. Внимание! Охлаждающий элемент на задней стороне будет нагреваться во время работы фары. Пожалуйста, убедитесь в том, что все детали зафиксированы надлежащим образом, чтобы избежать помех для любой движущейся части или функции автомобиля. Для бездорожья – не одобрено для дорог общего пользования.

tr Dikkat! Işığın kaynağına doğrudan bakmayın. Far çalışırken arkadaki soğutma elemanı ısınacaktır. Aracın herhangi bir hareketli parçası veya elemanı ile etkileşimi önlemek için lütfen tüm parçaların düzgün şekilde sabitlendiğinden emin olun. Off road'a uygundur – umumi yollar için onaylı değildir.

pl Nie patrzeć bezpośrednio na włączone źródło światła. Uwaga! Podczas pracy reflektora, element chłodzący znajdujący się na jego tyle będzie się nagrzewać. Należy sprawdzić, czy wszystkie części są prawidłowo zamontowane, aby uniknąć ewentualnych zakłóceń w działaniu ruchomych części i funkcji samochodu. Niedopuszczony do użytku na drogach publicznych.
